

February 21, 2024

Dear Residents, Contractors, Haulers, and Developers:

The Minnesota Department of Transportation (MnDOT) will be initiating spring load restrictions **on Monday, February 26<sup>th</sup>, 2024 at 12:01 AM**. Minnesota Statute 169.87 dictates that all loads on paved roads within the City of Hastings will be limited to 10 tons per axle during the Spring Load Restriction period unless otherwise posted.

The City of Hastings will place limits into effect at the same time as the MnDOT. However, many roads within the City of Hastings were not constructed to handle 10 tons per axle. Therefore, the City of Hastings requests that all loads on paved roads within the City of Hastings will be limited to 5 tons per axle during the Spring Load Restriction period, with exception to the roads listed on the following page and map attached. 10 tons per axle are acceptable on the roads indicated on these attachments.

Road restrictions typically last up to 8 weeks however the end date is largely weather dependent. Please see the MnDOT website for more information on load limits, including when load restrictions end.

<https://www.dot.state.mn.us/loadlimits>

The City looks forward to another successful construction season. We respectfully request deliveries be scheduled to avoid hauling oversized loads during this period. **The City WILL enforce load restrictions.**

If you have any questions please contact the Engineering Department at (651) 480-2334.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cody J. Mathisen'.

Cody Mathisen, P.E.  
Principal Engineer

**Note: You are receiving this letter because you are on a mailing list that we have compiled based on past interest. If you would like to be removed from this list, please email Samantha Schmidtke at the Engineering Department at [sschmidtke@hastingsmn.gov](mailto:sschmidtke@hastingsmn.gov)**

# City of Hastings
