

2024 Mill & Overlay Program Update #5 – 6/7/24

What has happened this past week?

- Adjusted manholes and gate valves
- Milled top 2" of pavement on all streets within the project
- Paved top 2" of pavement on all streets within the project

Left: Paving

Center: Milling

Right: Paving Complete

What is scheduled for next week?

- Apply traffic markings to 31st Street and South Frontage Rd
- Apply compost seed behind concrete curb & gutter and pedestrian ramps
- Punchlist items

Note: The project is near complete! This will be the last construction update. Thank you for your patience with the project and enjoy the new roadway surface! The City respectfully asks residents to help keep their newly applied compost seed watered. Water will increase the success of the product especially during the coming hot summer months. Please know that a second application of compost seed will be applied to areas of need in September when the air temperature cools down a bit.

Questions or Concerns?

- Project management services are being provided by the City's Engineering Department. Please call the Assistant City Engineer at (651) 480-2369 with project related questions and concerns.
